INTRO

De-Concrete is a company specialized in decorative concrete systems for both vertical and horizontal applications. With an experience that goes back in time to the year 1994 under other company's name, De-Concrete decided to have its own identity by registering its name officially in 2002. Since that year on, De-Concrete proved to be a professional company working in the field of stamped and decorative concrete.

De-Concrete earned the confidence of its clients which made it the most recommended company in its fields through out the Lebanese market. As a matter of fact, De-Concrete started achieving approximately 70,000 sqm in its first 2 years and ended achieving 250,000 sqm in the year 2010 & above through out the Lebanese territories for both public and private sectors.

De-Concrete Systems transform ordinary concrete into extraordinary, beautiful and durable building materials. The engineered systems address specialized requirements for interior, exterior and vertical uses with a compatible range of coloring admixtures, floor hardeners, color cementitious toppings, overlay texturing tools, as well as comprehensive technical support.

De-Concrete relies on research and development so that it maintains what it has achieved and what it aims for. Moreover any new product displayed in international fairs, and adequate for the Lebanese market, De-Concrete will be the first in applying it.

De-Concrete expertise labour-ship uses top quality products to guarantee the final results. Nevertheless the prices De-Concrete offers are very competitive with respect to the quality it produce.

De-Concrete invites you to visit its offices at the Gardenia Center, Hazmieh - Lebanon.

SASSOITALIA 2CM

YOUR WISHES OUR EXPERIENCE

Beautiful, unique, practical. With De-Concrete Sassoitalia you can obtain exactly the paving you desire: great scenic effect and typically Italian style, extremely resistant to weathering and impact, easy to clean and maintain. De-Concrete, the leader in decorative concrete technology, is ready to fulfill your desires.

IT ADAPTS TO ANY ENVIRONMENT

De-Concrete has combined historic terraces and modern polymer technologies to produce De-Concrete Sassoitalia: a unique system for even and consistently exposed aggregates paving. You can choose between exotic marble aggregates offered by De-Concrete or you can use local aggregates for a more natural result. You can also create geometric shapes, colours and specific matching and combinations, giving free rein to your creativity.

You can use Sassoitalia on freshly placed or old concrete, making this technology the perfect solution for new build construction or renovation projects. Sassoitalia is extremely flexible because it requires a thickness of only 2 to 4 cm over existing concrete. For long-lasting beauty, the surface can be treated with anti-dust, oil-proof or waterproof sealers.

Sassoitalia is perfect for private homes, patios and terraces or for public places such as squares, sidewalks and avenues. Pedestrian or vehicular traffic make great use of the anti-slip finish of Idealwork Sassoitalia in both wet and cold conditions. Due to its monolithic structure Sassoitalia is not subject to depressions or settlement, ensuring a consistent result over the years.

SASSOITALIA POLISH

WE INTERPRET FLOORING IN THE STYLE YOU PREFER MOST...

Terrazzo is a durable type of flooring made from Italian marble aggregates embedded in a High quality Italian mixed design cement and polished to a high sheen. Modern versions can include materials such as onyx, glass, metal, granite and even mother of pearl.

2.5 cm

Lixio (Microterrazo 6 mm)

LIXIO MICROTERRAZO 6MM

LIXIO-MICROTERRAZZO 6 MM ONLY POLISHED

Cementitious topping with marble aggregates optimized for polishing

LIXIO® is a polymer modified cement based microterrazzo. By using LIXIO® it is possible to create high-end polished surfaces. High quality Italian marble aggregates are used to offer a prestigious and modern floor. With only 5-7 mm thickness it is possible to create a high abrasion resistant surface, ideal for commercial and residential areas such as shops, restaurants, hotels, museum and private villas. Each floor is a unique creation. The customer can choose his own mix of aggregates and the grade of polishing (from textured to high gloss polish). LIXIO® can be applied not only inside but also outside where a textured "buccardè" finish is recommended for an elegant slip resistant finish.

Microtopping 3 mm

MICROTOPPING 3MM

RENEW YOUR SURFACE IN ONLY 3 MILLIMETERS

In only three millimetres of thickness, with De-concrete Idealwork Microtopping it is possible to renew existing surfaces on different substrates (concrete, self-leveling, ceramics, wood, etc.) without removing them. De-concrete Idealwork Microtopping presents extraordinary adhesion properties, high abrasion resistance and climatic stress; it performs perfectly on floor heating.

Before

After

ACID STAIN

DE-CONCRETE IDEAL-STAIN

They are particular reactive stains, based on metallic salts, which penetrate the concrete and chemically change its' color, creating different, variegated and permanent effects. The result is unique for each surface, depending on chemical composition, mixture porosity, age, texturing, concrete color, number of applications and other factors.

Modern and artistic designs, natural beauty, providing a great effect.

Unique and permanent color effects.

SMOOTH CONCRETE

ARCHITECTS NEED

Smooth Concrete answers the needs for all architects influenced by the minimalistic architecture and construction. Its smooth, cloudy raw look, makes the system a live one, that changes through time to a vintage material for floor cover.

STAMPED CONCRETE

PRINTED CONCRETE

De-concrete Stamped concrete, often called textured or imprinted concrete, is concrete that replicates stones such as slate and flagstone, tile, brick and even wood. Ideal for beautifying pool decks, driveways, entries, courtyards, and patios, stamped concrete is the perfect outdoor paving choice.
